

Transform BIA & BCP from One-Off Projects into Structured, Ongoing Services

The Challenge of Delivering Scalable, High Quality BIA & BCP

Today's clients expect you to go beyond backups and incident response and understand how their business actually runs and what must stay online, no matter what. Traditional, spreadsheet-driven Business Impact Analysis (BIA) and Business Continuity Planning (BCP) projects that focus on documentation instead of business-first prioritization make that hard to deliver at scale. Cynomi gives MSPs and service providers a structured, repeatable way to deliver business continuity as an ongoing, data-driven service.

Key Features include:

- Unified BIA, BCP and Risk in one platform
- Automated BIA reports & BCP templates
- Guided BIA & BCP process builder
- Critical process gap analyzer & prioritization
- Impact quantification & executive-ready outputs

How Cynomi Strengthens Business Continuity

Cynomi transforms Business Impact Analysis and Continuity Planning from disconnected documents into a unified, execution-ready resilience capability embedded directly into your security program.

Structured, Business-Driven Impact Analysis: Identify and prioritize critical processes based on what must stay operational first, quantify impact, and map RTO/RPO and dependencies within your live risk environment.

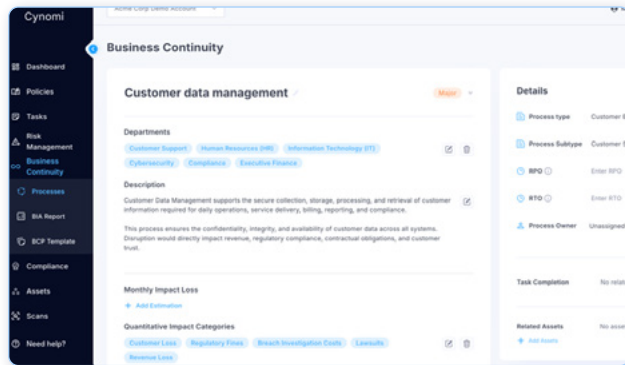

Dependency and Critical Process Visibility: Surface how business processes, assets, and third parties interconnect to eliminate blind spots and clarify recovery priorities.

Standardized, Defensible Continuity Planning: With an intuitive interface guide teams through a consistent BIA and BCP process with structured workflows and repeatable, professional plan outputs.

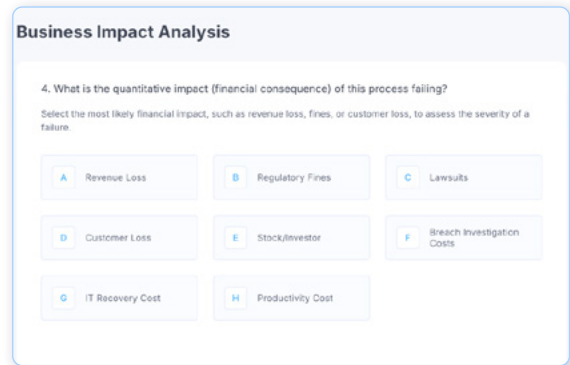

Impact-Driven Remediation Alignment: Translate continuity gaps into prioritized, impact-based remediation tasks automatically aligned with and feeding into your security roadmap.

Dynamic, Executive-Ready Resilience Reporting: Automatically generate evolving BIA and BCP reports with historical tracking that demonstrate measurable resilience progress.

Cynomi Business Impact Analysis

Key Benefits for Service Providers

- ✓ Deliver higher-value continuity services with less effort
- ✓ Upskill your team and reduce dependency on a few experts
- ✓ Turn BIA/BCP into an ongoing, recurring service
- ✓ Make it easy for clients to see what to do next
- ✓ Quantify business resilience to differentiate your offering and win more deals

Take the Next Step with Cynomi

Cynomi embeds Business Impact Analysis and Continuity Planning directly into your cybersecurity workflow, connecting business priorities, risk, remediation, and executive reporting in one intuitive, coherent, scalable system. This enables you to deliver operational resilience with confidence and turn resilience into a driver of strategic growth.
