

Turning Cyber Risk into Business Aligned Decisions

A Practical, Scalable Approach to Risk for Service Providers

Risk management is one of the hardest cybersecurity disciplines to operationalize and explain to clients. Traditional, spreadsheet-driven risk registers are complex, hard to scale, and difficult for business leaders to understand.

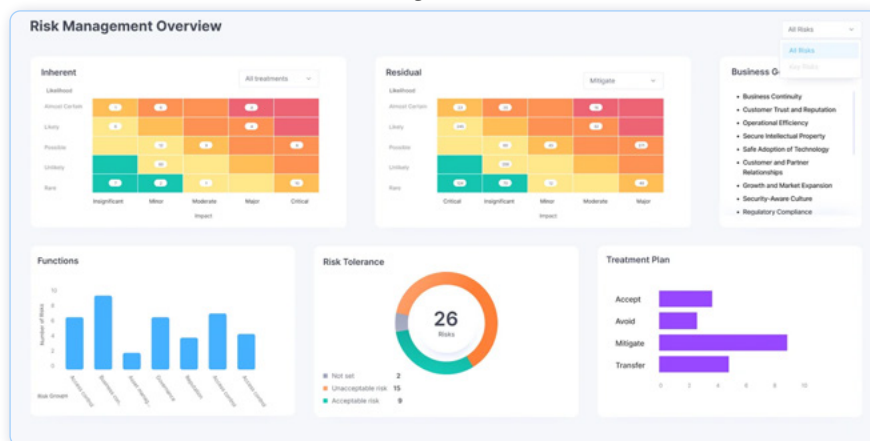

Cynomi simplifies this by translating cybersecurity gaps into clear, business-aligned risks, making it easy to consistently identify, prioritize, communicate, and track risk for clients without adding operational complexity.

What Risk Management Delivers

Cynomi provides a centralized view of risks that are ranked, actionable and aligned to you clients' business priorities. The platform automates a structured risk approach and view for each client using:

- Heatmaps with Inherent and Residual Risk Visibility:**
 Provides visibility for both inherent risk and residual risk (the level of exposure pre/post remediation efforts). Clearly demonstrate how security actions translate into meaningful risk reduction, without relying on subjective explanations.
- Structured, Assessment-Driven Risk Register:**
 Consolidates assessment-driven risks, prioritizes key exposures, and connects risk to action, enabling clear executive communication, focused remediation, and defensible, goal-driven risk decisions.
- Risk Tolerance and Unacceptable Risk Identification:**
 Enables you to define risk tolerance thresholds that reflect the organization's appetite for risk. When residual risk exceeds the accepted threshold, it is clearly identified as unacceptable, signaling where action is required.
- Clear Connection Between Risks, Tasks, and Controls:**
 Provides a clear line of sight from high-level risk strategy to day-to-day execution, with every risk directly linked to the remediation tasks and controls that mitigate it.

Risk Management Overview

Key Benefits for Service Providers

Cynomi enables you to translate security gaps into clear, prioritized risks with defined tolerance and measurable reduction over time. This creates a common language for prioritization, decision-making, and accountability and turning risk management into a scalable, business-driven service.

Business-Driven Risk Management for Mature Clients

Offer mature clients a structured, business-aligned risk service that prioritizes the most impactful exposures, and supports confident, risk-driven decisions, beyond reactive fixes or checkbox compliance.

Risk Insights That Drive Action

Connect every risk directly to the tasks that mitigate it, turning risk management into a practical driver of roadmap planning, execution, and measurable business impact.

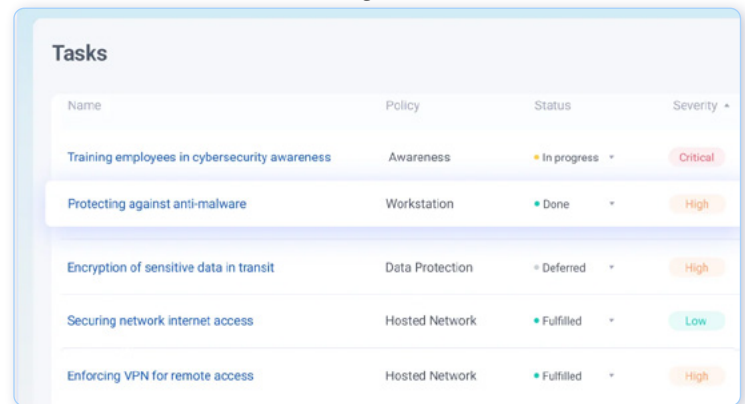

Standardized Risk Management at Scale

Replace spreadsheets and ad hoc risk registers with a structured, repeatable model. Scale risk management without adding complexity and deliver consistent risk practices across all clients.

Business-First Risk Conversations

Frame risk around business goals and outcomes and lead strategic, executive-level conversations focused on priorities, trade-offs, and risk acceptance.

Risk Management Tasks

Name	Policy	Status	Severity
Training employees in cybersecurity awareness	Awareness	In progress	Critical
Protecting against anti-malware	Workstation	Done	High
Encryption of sensitive data in transit	Data Protection	Deferred	High
Securing network internet access	Hosted Network	Fulfilled	Low
Enforcing VPN for remote access	Hosted Network	Fulfilled	High

Take the Next Step with Cynomi

Cynomi Risk Management anchors cybersecurity strategy by connecting business goals, risks, and remediation into one coherent workflow. It enables you to elevate your advisory role, strengthen executive trust, and deliver risk-driven cybersecurity services that scale.
