

# The Security Growth Platform for Service Providers

Built to scale your business, so you can protect every client.

Cynomi is the **Security Growth Platform** purpose-built for service providers—MSPs, MSSPs, consultancies, and cyber advisory practices—who want to deliver expert cybersecurity services at scale, without scaling headcount, complexity, or cost.

By embedding **CISO-level intelligence** into a highly visual, automated, and easy-to-use platform, Cynomi enables partners to sit confidently in the expert seat—guiding customers across security management, compliance, remediation, and risk management as a continuous program, not disconnected projects.

Cynomi Security Dashboard

## The Result?

Faster onboarding, consistent delivery, measurable outcomes, and new recurring revenue—across every client and every maturity level.

## The Challenge Scaling Cybersecurity Services

Cybersecurity is one of the biggest growth opportunities for service providers—but it's also one of the hardest to scale.

Partners struggle with:

- Security expertise trapped in a few senior people
- Manual assessments, spreadsheets, and static reports
- Compliance tools that are audit-first, not service-first
- One-off engagements instead of recurring programs
- Difficulty translating technical findings into business value
- Hidden revenue opportunities across the client bases

Traditional GRC tools weren't built for this model. They add overhead instead of leverage.

## The Cynomi Difference

Cynomi flips the model.

Instead of tools designed **for auditors**, Cynomi is designed **for service delivery**—turning expert security methodology into **repeatable, automated services** your entire team can deliver.

**We carry the complexity. You take the credit.**

## One Platform. Multiple Services. Infinite Scale.

Cynomi becomes the “how” you deliver cybersecurity services—bringing everything together into one unified, visual, and automated experience.

From a single platform, you can deliver:

- Security Program Management
- vCISO/vCIO & Cyber Advisory Services
- Compliance Readiness & Continuous Compliance
- Risk Management & Third Party Risk Management
- Remediation Planning & Execution
- Policy Management & Documentation
- Business Impact Analysis & Business Continuity Planning
- Portfolio-level Security Insights & Revenue Growth

All driven by automation, guided workflows, and embedded CISO logic.

## What Sets Cynomi Apart

### Built-In CISO Intelligence (Not Just Automation)

At the core of Cynomi is **CISO Intelligence**—the decision-making logic of an experienced security leader embedded directly into the platform.

This means the platform doesn’t just collect data—it tells your team:

- What matters most
- What to prioritize next
- Why it matters to the business
- How to sequence remediation
- How security actions reduce real risk
- How progress maps to compliance outcomes

This empowers **every team member**—not just senior experts—to deliver credible, defensible, executive-ready guidance.

### Visual, Intuitive, and Fast to Onboard

Cynomi is designed to be **used**, not managed.

- Wizard-driven onboarding and assessments
- Visual dashboards executives actually understand
- Clear posture scores and progress tracking
- Simple language instead of framework jargon
- One-click reporting and roadmaps

Partners can onboard customers quickly, establish credibility fast, and move from assessment to action in days—not months.

# Core Platform Capabilities

Capability	Description	
<b>Security Program Management</b>	Run security as an ongoing program—not a one-time assessment. Security maturity increases automatically through continuous program management.	<ul style="list-style-type: none"> <li>• Continuous posture tracking</li> <li>• Clear progress over time</li> <li>• Structured improvement instead of stalled reports</li> </ul>
<b>Compliance as an Outcome of Security</b>	Deliver compliance at scale without GRC overhead. Compliance improves automatically as security improves.	<ul style="list-style-type: none"> <li>• 40+ frameworks supported</li> <li>• Assess once, map everywhere</li> <li>• Automated framework cross-mapping</li> <li>• Continuous compliance posture updates</li> <li>• Audit-ready reporting without duplicate work</li> </ul>
<b>Automated Remediation &amp; Roadmapping</b>	Turn findings into action—automatically. No more reports that sit on a shelf.	<ul style="list-style-type: none"> <li>• Risk-driven remediation roadmaps</li> <li>• Clear, prioritized task plans</li> <li>• Dependencies and sequencing built in</li> <li>• Tasks mapped to risks, controls, and frameworks</li> <li>• Execution-ready for technical teams</li> </ul>
<b>Risk Management That Business Leaders Understand</b>	Translate cyber risk into business-aligned decisions. Security conversations move from “technical issues” to <b>business decisions</b> .	<ul style="list-style-type: none"> <li>• Structured risk register generated automatically</li> <li>• Inherent vs. residual risk visibility</li> <li>• Risk tolerance and unacceptable risk thresholds</li> <li>• Heatmaps and executive-friendly visuals</li> <li>• Clear linkage between risks and remediation actions</li> <li>• Plus leverage our Third Party Risk Management optional add-on to support continuously assessing customer vendors and translating risk into clear, actionable decisions.</li> </ul>
<b>Policy &amp; Documentation Automation</b>	Eliminate one of the biggest time sinks in security delivery. Hours or weeks of manual work reduced to minutes.	<ul style="list-style-type: none"> <li>• Policies generated automatically from assessments</li> <li>• Framework-aligned and client-specific</li> <li>• Editable, reusable, and consistent across customers</li> <li>• Policy maturity scoring to guide improvement</li> </ul>
<b>Third Party Risk Management (TPRM)</b>	Extend security and risk management beyond your client’s perimeter. Third-party risk is translated into clear, actionable insight, enabling confident decisions around vendor onboarding, prioritization, and remediation—without introducing separate tools or workflows.	<ul style="list-style-type: none"> <li>• Structured third-party risk assessments aligned to security and compliance frameworks</li> <li>• Context-aware vendor questionnaires without manual setup</li> <li>• Centralized visibility into vendor risk posture</li> <li>• Clear linkage between third-party risks, internal controls, and remediation actions</li> <li>• Continuous tracking of vendor risk over time, not point-in-time reviews</li> </ul>
<b>Designed for Service Providers—Only</b>	Cynomi isn’t partner first, we’re <b>100% partner-only</b> . We don’t compete with you. We exist to make you more successful.	<ul style="list-style-type: none"> <li>• Multi-tenant, MSP-native architecture</li> <li>• White-label ready</li> <li>• Built for how service providers actually operate</li> <li>• No channel conflict—ever</li> </ul>

Capability	Description	
<b>Business Impact Analysis (BIA) &amp; Business Continuity Planning (BCP)</b>	Translate cyber risk into operational and financial impact. By grounding security decisions in business impact, Cynomi enables faster prioritization, stronger justification for investment, and clearer conversations with executive stakeholders.	<ul style="list-style-type: none"> <li>Identify and prioritize critical business processes and assets</li> <li>Quantify downtime, operational disruption, and financial impact</li> <li>Link cyber risks and security gaps to business-critical functions</li> <li>Support business continuity and resilience planning with structured inputs</li> <li>Strengthen executive and board-level decision-making</li> </ul>
<b>Executive Dashboards &amp; Reporting</b>	Make value visible—without manual effort. This is where partners consistently say Cynomi <b>“puts us in the expert seat.”</b>	<ul style="list-style-type: none"> <li>Posture score (0–10) with trends over time</li> <li>Exposure views by attack type (ransomware, data leakage, etc.)</li> <li>Compliance progress across frameworks</li> <li>Open tasks and remediation status</li> <li>Business-ready visuals for QBRs and board conversations</li> </ul>
<b>Portfolio-Level Revenue Intelligence Automation</b>	Security delivery that fuels growth. Cynomi doesn’t just help you deliver security—it helps you <b>grow your business.</b>	<ul style="list-style-type: none"> <li>Visibility into gaps across all customers</li> <li>Mapping of gaps to partner services</li> <li>Quantified upsell and expansion opportunities</li> <li>Clear prioritization of where to focus next</li> </ul>

## What Partners Achieve with Cynomi

- ✓ Faster onboarding and time to value
- ✓ Consistent, defensible delivery across all clients
- ✓ Reduced manual effort and operational overhead
- ✓ Stronger executive trust and retention
- ✓ Scalable security services without scaling headcount
- ✓ New, predictable recurring revenue streams
