

Provide vCISO Services at Scale

With the first AI-driven vCISO platform

By EoY 2024, 86% of MSPs and MSSPs will offer vCISO services and answer growing SMB and SME demand. Yet current vCISO services models rely on human CISO expertise and manual work. This makes these services costly and tough to scale – leaving service providers unable to protect customers against growing cyber threats or meet tightening regulatory demands.

Stand Out and Scale Up with Cynomi

Coupling cybersecurity with compliance goals, Cynomi enables MSPs, MSSPs and consulting firms to provide ongoing risk assessments and vCISO services at scale - without straining their existing resources.

Built specifically for service providers, Cynomi includes:

Automated risk and security assessments for immediate insights

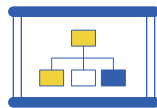

Vulnerability and exploit gap analysis

Compliance assessments & plans mapped to dozens of frameworks

Easy-to-follow tailored security policies

Prioritized remediation plans and task management

Exportable and shareable customer-facing reports

The Cynomi Effect

60%

increased revenue from existing customers

20%

customer base growth

40%-60%

reduction in risk assessment time

80%

decrease in report generation time

Employee onboarding time cut by

80%

"Cynomi allows us to expand into an entirely new customer base and sell additional services to existing clients." - Chris Bevil, CIO, InfoSystems

How Cynomi Works

Automated Cyber Profile

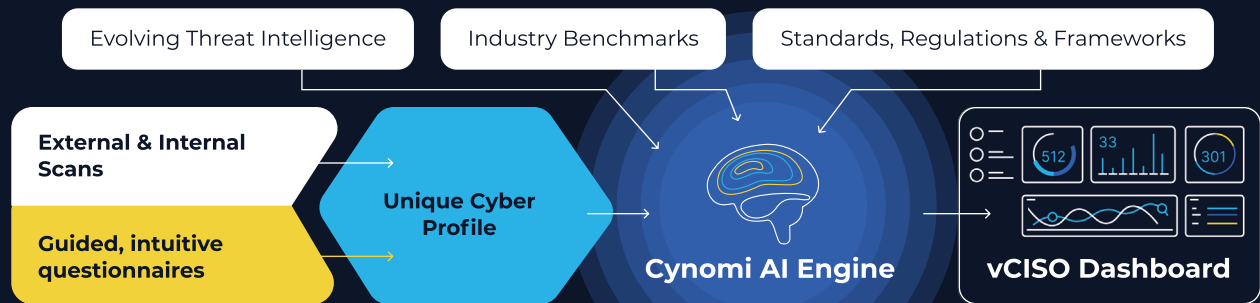

Cynomi automatically builds a unique cyber profile for each client based on easy to follow questionnaires, express scans and unparalleled CISO knowledge and knowhow.

AI-Driven Assessment

Proprietary AI algorithms update cyber profiles against standards, industry benchmarks, cybersecurity frameworks and threat intelligence.

Structured Processes

Security policies and tasks are automatically created and easily managed, tracked and measured to streamline vCISO work.

The Cynomi AI engine continuously processes data, in line with the customer's changing environment, processes, new-found vulnerabilities and compliance requirements.

Why Cynomi Now?

Improve Efficiency

Reduce vCISO tasks' time by over 40%. Get new employees on board quickly and delegate responsibilities to non-senior team members.

Grow Revenue

Expand your customer base and secure recurring revenue with existing customers by offering ongoing vCISO services.

Increase Upsells

Leverage Cynomi's reports to demonstrate tangible impact and increase upsell of services and products.

Demonstrate Value Quickly

Onboard customers quickly and cut their time-to-value by half. Use Cynomi to standardize deliverables and continuously communicate the value.

"What has taken weeks in the past takes days with Cynomi."

- Steve Bowman, VP Sales &Marketing, Model Technology Solutions
